

Accessing the Updated Website

As part of the upgrade, you may notice some visual changes and you may be asked to re-enter your username and password. This is expected and helps ensure your account remains secure.

Your username and password will remain unchanged. In most instances, if these credentials are stored in your browser or within a password management application, they should automatically populate as usual. If you have not done so you will be prompted to enter them manually.

If you forget your password, use 'Forgot Password?' to receive an email and set a new one.

If you are still experiencing issues then please contact us ([MWI | Contact Us](#)) and the team will be able to help you

New Features

- **Stock status badge** see availability at a glance as you browse

- **Compare products while browsing** before adding items to your basket. Useful if you are looking at similar products or sizes of items, allowing you a quick view of them side by side
- **Dashboard view:** quickly access recent orders and your location lists. This sits within the My Account and can be toggled on to become your Dashboard every time you log in.
- **Save orders:** store them in your account and retrieve them later
- **Download location lists** for easy offline access and sharing using the Export button on a Location List

The screenshot shows a user interface for adding items to a location list. At the top, there are icons for Copy, Edit, Delete, and Export. The 'Export' icon is circled in red. Below this is a search bar with the text "Add Items By Search" and "Find product". The search bar contains the placeholder text "Enter keyword, item # or part #". To the right of the search bar is a "Search items" section with a search input field containing the placeholder text "Search location by keyword or item number" and a magnifying glass icon. Below the search input is a purple button labeled "Add items to Basket". Underneath the button, there is a checkbox labeled "Select All" followed by "3 Items". At the bottom of the search section, there is a checkbox labeled "Select" and a "Sort" button. The product name "Leucofeligen FeLV/RCP 50 Doses" is displayed at the bottom right of the screenshot.

- **Add to location list** directly from product pages. Speeds up the addition of products to a location list or the set up of a new list.

- **Share a product with a colleague** and include a note for added context. This may be helpful if you want to check a product is the correct item required or a new product that your colleagues may be interested in.
